Kati Ernst, Kristine Zeller: Lifestyle of Longevity – Live Longer With More Energy

- Longevity: the word on everyone's lips – the best tips for a long and healthy life
- Tried, tested and proven by the authors
- For everyday use with an immediate effect

Longevity hacks for everyone

How long do I want to live? What do I want to get out of a longer life? And how might my answer change if I knew I could be bursting with energy till the very end? These are the questions Dr Kati Ernst and Kristine Zeller both asked themselves when their stressful lifestyles finally took a toll on their health. One thing was clear: It can't go on like this.

They discovered the lifestyle of longevity, a method for leading a long, healthy and energetic life. In this book, they share their insights and hacks for integrating the four areas of nutrition, exercise, rest and emotional health into even the busiest daily schedules. With more energy, better health and more vitality, the positive effects of these changes are instant!

© Katja Hentschel

Kati Ernst co-hosts the successful podcast 'Lifestyle of Longevity' with Kristine Zeller. After completing her studies in Münster, she worked at McKinsey and completed a PhD in Social Entrepreneurship. She is the co-founder and CEO of the company *ooia*. Kati is on the Board of the German Startups Association and the Advisory Board of the University of Münster Business School, and also works as a keynote speaker. She lives in Berlin with her husband and three children.

Kristine Zeller co-hosts the successful podcast 'Lifestyle of Longevity' with Kati Ernst and works as a keynote speaker on the subject of longevity. She is the co-founder and CEO of the company *ooia*. Kristine Zeller studied Business Economics for Textiles and has headed up numerous purchasing departments, including at the leading online fashion retailer Zalando. She lives in Berlin with her husband and two daughters.

Find your element and grow

Ever since Eckart von Hirschhausen was able to observe penguins on a cruise, he has known that penguins sussed it – the right life! What caused his insight? Hirschhausen had looked with pity at one of the small round animals in a chic tailcoat. Somehow, the little penguin appeared unwieldy, slow, and fragile on land. But then it jumped into the water and began to dance, to hunt, to move through the water at the speed of an arrow and in the most agile manner. That was the point when he knew: That animal is in its element. And it's only there that it can fully develop. From that point on Hirschhausen couldn't shake off this idea: What if we just need to find our element? Instead of wasting our energy on fighting our weaknesses and ultimately remaining no more than mediocre, we should find out what we are really good at and work to improve.

© Dominik Butzmann/Photothek

Eckart von Hirschhausen, M.D., was born in 1967 and is Germany's best known general practitioner. He is one of the most successful non-fiction authors and works for several charities and foundations. Medical information is brought home effectively through his wonderfully humorous presentation. Eckart von Hirschhausen has his own TV-shows as well as a national health magazine.

Radiate joy

After a painful break-up, Lena's self-esteem has hit rock bottom. Her best friend recommends The Self-Esteem Agency to help Lena create a new self-image. The programme is intense and enormously challenging, but it also opens new worlds up to Lena. She peers into the hidden corners of her heart where she encounters the shadows of her past. Every day, Lena learns to accept herself a little bit more and to appreciate herself for who she is. She re-discovers what she had lost: self-love. She recognises and acknowledges her true value and learns to invite joy into her life.

Tilman Lahme: Thomas Mann. A Life

- A wealth of new revelations from unpublished journals and correspondence never seen before between Mann and his best friend from childhood
- Includes a sublime piece of writing by Susan Sontag on her encounter with Thomas Mann, published here for the first time ever
- Brilliantly narrated by the author of the bestseller '*The Manns*', which has been translated into numerous languages

Tilman Lahme
Thomas Mann. A Life
 592 pages
 May 2025
 b/w photos

Genre: General Non-Fiction, Biographies / Memoirs

Thomas Mann's lifelong struggle with life, love and literature

Icon of 20th-century literature, Noble prize-winner, celebrated genius – and about as unhappy as it's possible to be. He loves and yet he cannot love, blocked as he is by the conventions of the age. What a source of inspiration for some of the greatest works of literature – and what a thoroughly miserable life.

His early global success with ›Buddenbrooks‹ open up door after door – all the way to the White House. No German voice denounces Hitler as vocally as his, no other writer garners as many accolades as he does. His wife Katia and his six children huddle around him like a cocoon. And yet, he is only ever one wrong-footed step away from tumbling into the abyss.

© Asja Caspari

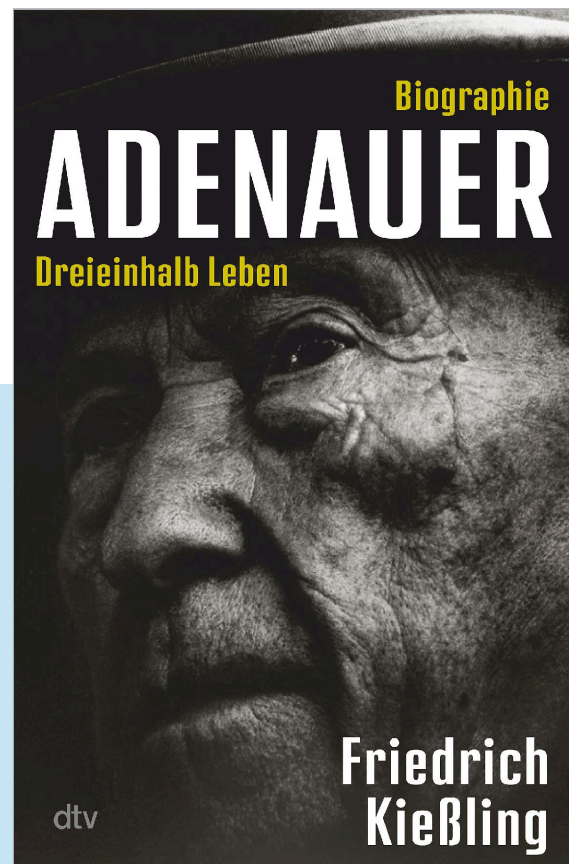

Tilman Lahme, born in 1974, is a literary historian and author. Lahme studied German, History and Philosophy. Since 2014, he holds the professorship for media history and critical journalism at Leuphana University in Lüneburg. Numerous publications about the Mann family, including a highly acclaimed biography of Golo Mann and the bestseller "The Manns. History of a family."

Friedrich Kießling: Konrad Adenauer – Three and a Half Lives. A Biography

- January 2026: 150th birthday of the founding father of the Federal Republic of Germany
- Leading contemporary historian: The first scholarly biography in over 30 years
- Adenauer's decisions continue to shape Germany and Europe today

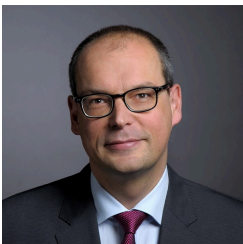

A mighty chancellor whose impact on Germany is still felt to this day

Konrad Adenauer played a huge role in successfully establishing democracy in Germany after 1945. His decisions in the drawing up of the Constitution, in dealing with the country's Nazi past, in introducing the social market economy, and in founding a Christian-democratic party have shaped the country of today. Adenauer led Germany out of international exile, both in Europe and on the global stage. Yet, he also caused an existential threat to this young democracy, with illegal party financing and his use of the secret services to spy on a rival party, the SPD. Friedrich Kießling paints a picture of a man with two faces, who held enormous power and knew how to wield it: for the country, for his party, and not least of all – for himself.

Friedrich Kießling

Friedrich Kießling, born in 1970, is Professor of Modern and Contemporary History at the University of Bonn. He has researched and taught in London, Vienna and Dresden, among other places. One focus of his work is the aftermath of National Socialism in the Federal Republic.

Jochen Buchsteiner: East-Prussians – The History of a Perfectly Ordinary German Family

- Brilliant narrative family history
- Captures the great issues of the modern day – displacement and exodus
- Eastern Europe through the lens of current politics and perceptions

Jochen Buchsteiner
East-Prussians – The History of a Perfectly Ordinary German Family
 288 pages
 May 2025

Genre: Biographies / Memoirs, History

Portrait of a forgotten province

Jochen Buchsteiner's book about East Prussia grew out of his grandmother's detailed diary of her exodus. Personal yet unsentimental, he traces the landowning family's westward journey, mapping out the losses suffered along the way – and not just by those leaving. Buchsteiner paints a picture of an almost entirely forgotten German province, revealing both its tragedy and its unique history and culture, and shedding light on a repressed part of the German identity. Two generations after Marion Dönhoff, Jochen Buchsteiner delivers a family history that dares to take a fresh perspective on Germany's past.

© Amd Hoffmann

Jochen Buchsteiner, born in 1965, studied Political Science and Rhetoric. He worked as a parliamentary correspondent for *ZEIT* magazine, reported from South Asia, the Indo-Pacific region and the UK for *Frankfurter Allgemeine Zeitung*. He has since returned to Berlin where he works for *FAZ* as a political correspondent.

Leonie Maßmann: An Ocean of Questions – How I Sail Around the World and Find Answers

- Self-help through adventure: a tale of daring to be happy
- Life coaching, personal development and practical tips
- A book to inspire and motivate

An enchanting story of a journey to find one-self

Leonie Maßmann tells the story of her globe-trotting adventures on a tiny sailing boat. And of what it means to live the dream – with all its highs and lows. Along the way, she learns to trust her intuition, to leave her doubts behind, to make decisions, to keep going, not to get discouraged, to outgrow herself, to be tolerant, to leave her comfort zone, to be spontaneous, to weather periods of idleness, to change her outlook, to deal with extreme situations and anxiety – and what it means to work together. Because at the end of the day, not only does her dream come true – her journey helps her discover who she is.

© Thilo Ernst

Leonie Maßmann grew up near Dortmund and studied Special Needs Education in Cologne. At the age of 22, she left her old life behind her to make her dream come true – accompanied by her boyfriend Thilo and his best friend. With zero prior knowledge, they bought a sailing boat, spent a year fixing it up and then set off to sail the world. Now, Leonie and Thilo make their living from the videos, pictures and stories they share about their journey.

Dirk Brockmann
Survival of the Nicest – How Nature Shapes Our World Through Cooperation
 288 pages
 June 2025

Genre: Popular Science, General Non-Fiction

Cooperation and diversity will be the solution to overcoming the crises of our age

Cooperation is a fundamental principle of all life on earth. ›Survival of the Fittest‹, or the notion that competition drives natural selection, may be crucial to gradual development and improvement – but innovations can only emerge from symbiosis. Today, we know that not a single animal, plant or complex organism can make it in this world without cooperation. Dirk Brockmann guides us through the world of symbiosis, describing the power of bacteria and explaining how revolutionary innovations were only made possible through cooperation.

© Monika Keller

Dirk Brockmann, born in 1969, is a professor of Biology at Berlin's Humboldt University and heads a research group at the Robert Koch Institute. Previously, he was a professor of applied mathematics and researcher in the US. He is particularly interested in the structures inherent to complex biological and social networks, and how these structures affect those processes that operate within them.

Tim Vollert: Searching for the Meaning of Life with Physics

- There is a clear answer to the question ›What is the meaning of life?‹ – and it can be found in physics
- Larger than life: an existential exploration of ourselves and the cosmos
- The author as knowledge mediator who brings physics to life

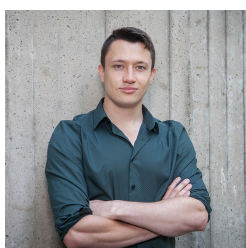

Life is no accident

More than a few of us have lost sleep over the realisation of how vanishingly small we are in the grand scheme of the cosmos. Our world has been around for aeons, yet modern humans only appeared 350,000 years ago. So what is the meaning of life then? The answer, according to science influencer Tim Vollert, can be found in physics. The sum of our parts is a logical consequence of natural laws. On a journey from the Big Bang to the heat death of the universe, he explains the physics of the cosmos and the biology behind the origins of life, delving deep in his search for meaning.

Tim Vollert

Tim Vollert has dedicated himself to communicating knowledge: on TikTok, YouTube and in his successful podcast 'Raum & Zeit' (Space & Time), he talks about physics, the cosmos and the meaning of life – for everyone. He studies physics and biology.

Wolfgang Benz: The Future of Remembrance – The German Legacy and the Next Generation

- What will remain 80, 100 years after the end of the Holocaust?
- Wolfgang Benz is the doyen of German Holocaust research
- Previous books by the author have been translated into numerous languages

Wolfgang Benz
The Future of Remembrance – The German Legacy and the Next Generation
 240 pages
 March 2025

Genre: Current Affairs, General Non-Fiction

What began in 1945 will not end with the death of first-hand eye-witnesses – the culture of remembrance will live on.

But the place which the Holocaust occupies in history will increasingly change, from one generation to the next and as more migrants move to the country. What will not change is Germany's political obligation. Wolfgang Benz sketches the origins of the German culture of remembrance, engaging with the ritualisation and bureaucratisation of remembrance and warning against smug self-satisfaction. He shows the younger generation how to carry the burden of National Socialism without becoming overwhelmed. Because while it is clear that the crime was enormous and singular, it should not be wielded to justify any and every political obligation. The doyen of Holocaust research takes stock of Germany's relationship with its past and adopts a decisive position on the current heated debate.

© privat

Wolfgang Benz, born in 1941, is professor emeritus of History and was Director of the Centre for Research on Anti-Semitism at the Technical University of Berlin until his retirement in 2011. In 1992 he received the *Geschwister Scholl Prize*. He is co-editor of the *Journal of Historical Science* and author of numerous publications, including some standard works, on German history in the 20th century.

Vera Müller-Skuplik: Being There When Pets Die – A Vet's Tale

- A practical and compassionate guide for everyone who wants to be present when their beloved pet makes their final journey
- In veterinary practices there is no time for this subject though there is a huge need: this book fills the gap

When beloved pets pass on

No one likes to think about how the lifespan of their beloved dog or stubborn cat is shorter than that of a human being. But it's an issue all pet owners have to wrangle with. What if your beloved pet has reached the end of the road? Should you put them to sleep? And when? Who makes that decision? Who should be there when it happens?

This book gives readers tips and information to help them make decisions when their pet's life is nearing its end. What is medically possible? What are the ethical options? Putting down an animal isn't easy. Veterinarian Vera Müller-Skuplik takes the issue seriously – while also writing about the intimate and at times curious moments that happen in the relationships between people and animals.

© Andrea Große Halbuer

Vera Müller-Skuplik, born in 1975, studied veterinary medicine at the Hannover University of Applied Sciences. She has been practising as a veterinarian for over twenty years, is an overnight and emergency vet for an online pets advice service, and gives popular science talks on everything to do with pet care and veterinary medicine. She lives near Münster with her family and their cat.

Vince Ebert: Wot Se Fack – Why Our Feelings Have Lost the Plot

- More than 100,000 copies of 'Keep Calm and Talk About Climate Change' sold
- Enlightenment over gut feeling: a light-hearted plea for a fact-based survey of our present day

Vince Ebert
Wot Se Fack – Why Our Feelings Have Lost the Plot
 ca. 304 pages
 August 2025
Genre: General Non-Fiction, Current Affairs

Armchair science – We live in an age where knowledge no longer matters

Vince Ebert explains how politics and ideology these days are prioritised over knowledge and facts. Now, there is a tendency to ignore facts, to discredit experts and to do away with the idea of a knowledge society that still values truth and debate. Ebert takes aim at this trend, providing historical context and calling for a second Enlightenment: a digital detox, a return to science and an end to self-imposed immaturity. If we are to overcome the challenges of the future, we need more knowledge, more reason and more science – not less.

© Frank Edel

Vince Ebert, born in 1968, studied Physics in Würzburg. Before starting a career as a cabaret artist in 1998, he worked in a consulting company as well as in market research. His goal is to present complex scientific ideas in a generally comprehensible and humorous way; Vince Ebert's slogan is 'Make science great again'. All of his books have hit the bestselling lists. He lives in Vienna.

Lara Ermer: All-Out War – What Psychology Can Tell Us About Political Correctness, Conspiracy Theories and Other Triggers

■ The power of arguing: Entertaining tips for your next shouting match

■ Psychological studies have never been this fun

Had an argument today? No? Well it's about time then!

Feel like there's no end to conflicts? Like the world is somehow out of whack and all of a sudden you're falling out with everyone, even your BFF and your Auntie Sue? Lara Ermer says, 'Pull your head out of the sand and arm yourself for your next argument!' And if it's going to come to blows anyway, then why not also be in the right for a change? *All-Out War* offers knock-out arguments and scientific facts to help us get through our next family gathering, watch the news without having an embolism, and simply enjoy a more chilled-out life.

Lara Ermer
All-Out War – What Psychology Can Tell Us About Political Correctness, Conspiracy Theories and Other Triggers
 256 pages
 March 2025

Genre: Politics / Economics, Current Affairs

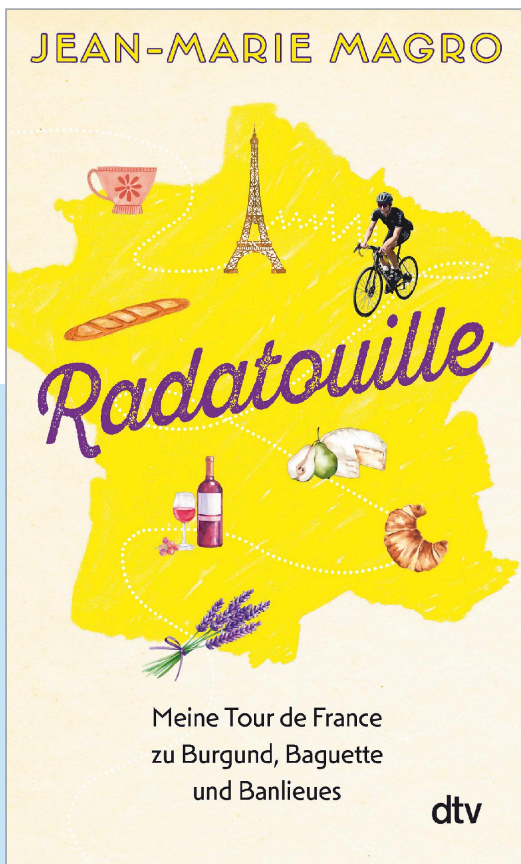

© Marvin Ruppert

Lara Ermer is an author, presenter and comedian. She studied psychology, however, she eschewed the traditional career as a psychologist and instead took her talents to the stage. Released in 2021, Ermer's first publication '*An Open Book – On Ideal Bodies, Perfect Sex and Other Myths*' was a surprise hit. Lara Ermer regularly appears on TV, radio, podcasts and other online formats. Her work has received awards like the *German Cabaret Prize* 2024.

Jean-Marie Magro: Burgundy, Baguettes & Bicyclettes – My Tour de France

- France is a country of polar opposites and fascinating diversity
- A holiday read as entertaining as it is smart and surprising
- Exploring France by stealth, it's never been described like this before

Jean-Marie Magro
Burgundy, Baguettes & Bicyclettes – My Tour de France
 320 pages
 April 2025
Genre: General Non-Fiction

La France, mon amour

With one foot in Munich, one in Provence, and both firmly planted on the pedals, roving reporter Jean-Marie Magro sets out to discover France by bike on a real-life Tour de France: from Paris to the Ch'tis; from the Pyrenees to Alpe d'Huez and Mont Ventoux; and from Mont Saint-Michel to the peaceful Basque Country via Cognac and Bordeaux.

How does a true Breton eat galettes and how do satirists spoof politics so skilfully? Why is going on strike almost a national sport and why has manga captured the hearts of young people in the land of Asterix and Obelix? Magro answers these and many more questions in his affectionate and lively book.

© Martin Visintin

Jean-Marie Magro was born in Munich in 1992. He researches political, economic and social issues for a Bavarian radio station. As his name would suggest, his specialist interests are German-French relations and European politics. But his true passion is cycle racing. One day, he would like to commentate on the Tour de France.

 Genre: Self-Help / Parenting

A key epoch of German history is being re-examined: Otto the Great and his empire is being excavated

The 10th century is considered the beginning of German history: the Ottonian dynasty transformed East Francia into what was to become the Holy Roman Empire of the German Nation: the origin of Germany. This turning point in European history can now be presented in a completely new way, thanks to a large number of current archaeological excavations and archaeogenetic investigations. It is an epoch of a German '*Game of Thrones*' with intrigue, fratricidal struggles and battles: the victory over the Magyars, the enslavement and Christianisation of the Slavs as well as power-conscious Byzantine princesses and the search for the heart of Otto the Great. Germany's role in the middle between East and West, the conflicts between religions and the national and ethnic power struggles shape Germany and Europe to this day.

The menopause is a natural part of life that every woman experiences at some point.

And yet it is still a taboo subject that is often met with shame. Although two-thirds of women experience severe symptoms during this time, significantly affecting their daily lives and quality of life, women in menopause are medically underserved. The consequences are incorrect diagnoses, a lack of counselling and inappropriate treatment approaches. Women feel left alone and are looking for answers. Renowned gynaecologist Dr Katrin Schaudig and journalist Katrin Simonsen aim to answer the most important questions about this phase of life. A concise question-and-answer structure makes the most important information accessible in a way that is both easy to understand and medically up to date. The perfect book for a concise, profound orientation.
